ABOUT

Over the past 7 years I have successfully worked as a software engineer on large-scale content, social media, E-commerce, and digital entertainment websites. I have extensive experience in front-end technologies as well as experience in back-end development.

EXPERIENCE

Demand Media > Software Engineer Oct 2012 > Present

Working at Demand has lead to a heavier focus on full-stack software engineering responsibilities.

- › Developed mobile web pages, new features and bug fixes on Society6.com.
- › Developed subscription class templates and payment flows for Creativebug.com.

Cimarron Group > Front-End Web Developer Feb 2011 > Oct 2012

Core responsibilities at The Cimarron Group included project conceptions and front-end development of desktop and mobile websites for brand, hospitality and entertainment clients.

- › Won 2012 FWA Site and Mobile Site of the Day awards for lead development on Tim Burton's Dark Shadows website.
- › Created mobile website games and responsive design interactive sites for tablet and mobile devices.

Sony Pictures Television > Manager, Multimedia Marketing Oct 2008 > Feb 2011

At Sony, I acquired the role of supervisor for a few employees and management of all SPT domestic websites.

- › Built a CMS system for an internal Sony Pictures Television website using PHP, and MySQL.
- › Designed and developed content heavy websites using HTML, CSS, PHP, MySQL and Photoshop.

LP33.tv > Web Developer April 2008 > Oct 2008

My desire to succeed in the software development field began at this online music social networking startup.

- › Developed front-end web features using HTML, CSS and PHP.
- › Designed page layouts using Photoshop and created Flash animated banners.

Northrop Grumman > Mechanical Engineer II 1999 > April 2008

For 10 years, I worked as a mechanical engineer for companies including Boeing, Conexant Systems, American Suzuki Motor Corp, and Northrop Grumman. My last engineering project was on the F-35 Joint Strike Fighter program.
